

**Solve each problem.**

- 1) Compare the approximate reams of paper used per week of School A to School B.

School A	
Weeks	Reams of Paper Used
3	166
4	226
5	285
6	341
8	459

$$166+226+285+341+459 = 1,477 \text{ total reams used}$$

$$3+4+5+6+8 = 26 \text{ total weeks}$$

$$1,477 \div 26 = 56.8$$

$$121+237+298+414+528 = 1,598 \text{ total reams used}$$

$$2+4+5+7+9 = 27 \text{ total weeks}$$

$$1,598 \div 27 = 59.2$$

- 2) Compare the approximate pencils per second produced by Machine A to Machine B.

Machine A	
Time (Seconds)	Pencils Produced
4	366
5	460
6	555
7	648
8	742

$$366+460+555+648+742 = 2,771 \text{ total pencils}$$

$$4+5+6+7+8 = 30 \text{ total seconds}$$

$$2,771 \div 30 = 92.4$$

$$103+385+479+573+855 = 2,395 \text{ total pencils}$$

$$1+4+5+6+9 = 25 \text{ total seconds}$$

$$2,395 \div 25 = 95.8$$
