

Determine which number correctly answers both equations.

Ex) $20 \div 4 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 4 = 20$

1) $18 \div 6 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 6 = 18$

2) $27 \div 3 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 3 = 27$

3) $12 \div 3 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 3 = 12$

4) $56 \div 8 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 8 = 56$

5) $40 \div 8 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 8 = 40$

6) $8 \div 1 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 1 = 8$

7) $8 \div 8 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 8 = 8$

8) $45 \div 5 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 5 = 45$

9) $36 \div 9 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 9 = 36$

10) $8 \div 4 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 4 = 8$

11) $15 \div 5 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 5 = 15$

12) $48 \div 8 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 8 = 48$

13) $9 \div 9 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 9 = 9$

14) $6 \div 2 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 2 = 6$

15) $35 \div 7 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 7 = 35$

16) $14 \div 7 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 7 = 14$

17) $72 \div 8 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 8 = 72$

18) $42 \div 6 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 6 = 42$

19) $45 \div 9 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 9 = 45$

20) $4 \div 4 = \underline{\hspace{2cm}}$
 $\underline{\hspace{2cm}} \times 4 = 4$

AnswersEx. **5** _____

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. _____

19. _____

20. _____

Determine which number correctly answers both equations.

Ex) $20 \div 4 = \underline{\quad}$
 $\underline{\quad} \times 4 = 20$

1) $18 \div 6 = \underline{\quad}$
 $\underline{\quad} \times 6 = 18$

2) $27 \div 3 = \underline{\quad}$
 $\underline{\quad} \times 3 = 27$

3) $12 \div 3 = \underline{\quad}$
 $\underline{\quad} \times 3 = 12$

4) $56 \div 8 = \underline{\quad}$
 $\underline{\quad} \times 8 = 56$

5) $40 \div 8 = \underline{\quad}$
 $\underline{\quad} \times 8 = 40$

6) $8 \div 1 = \underline{\quad}$
 $\underline{\quad} \times 1 = 8$

7) $8 \div 8 = \underline{\quad}$
 $\underline{\quad} \times 8 = 8$

8) $45 \div 5 = \underline{\quad}$
 $\underline{\quad} \times 5 = 45$

9) $36 \div 9 = \underline{\quad}$
 $\underline{\quad} \times 9 = 36$

10) $8 \div 4 = \underline{\quad}$
 $\underline{\quad} \times 4 = 8$

11) $15 \div 5 = \underline{\quad}$
 $\underline{\quad} \times 5 = 15$

12) $48 \div 8 = \underline{\quad}$
 $\underline{\quad} \times 8 = 48$

13) $9 \div 9 = \underline{\quad}$
 $\underline{\quad} \times 9 = 9$

14) $6 \div 2 = \underline{\quad}$
 $\underline{\quad} \times 2 = 6$

15) $35 \div 7 = \underline{\quad}$
 $\underline{\quad} \times 7 = 35$

16) $14 \div 7 = \underline{\quad}$
 $\underline{\quad} \times 7 = 14$

17) $72 \div 8 = \underline{\quad}$
 $\underline{\quad} \times 8 = 72$

18) $42 \div 6 = \underline{\quad}$
 $\underline{\quad} \times 6 = 42$

19) $45 \div 9 = \underline{\quad}$
 $\underline{\quad} \times 9 = 45$

20) $4 \div 4 = \underline{\quad}$
 $\underline{\quad} \times 4 = 4$
