

**Solve each problem.****Answers**

- 1) An industrial machine made 872 shirts. If it made one minute to make 8 shirts, how many minutes was it working?
- 2) A mailman has to give out 702 pieces of junk mail. If he goes to 6 blocks how many pieces of junk mail should he give each block?
- 3) Carol had 196 video games. If she placed the games into 7 different stacks, how many games would be in each stack?
- 4) A pallet of boxes weighed 252 kilograms. If there were 6 boxes on the pallet and each box weighed the same amount, how much did each weigh?
- 5) There are 876 students in a school. If the school has 2 grades and each grade had the same number of students, how many students were in each grade?
- 6) Will played 6 rounds of a trivia game and scored 924 points. If he gained the same number of points each round, how many points did he score per round?
- 7) A school ordered 288 new pencils for the state tests. If they gave each student 4 pencils, how many students are in the school?
- 8) Ned made 180 dollars mowing lawns over the summer. If he only had 5 customers and each person paid the same amount, how much did each person pay?
- 9) Bianca had 664 pennies. If she put them into stacks with 4 in each stack, how many stacks could she make?
- 10) Mike had 486 baseball cards in 2 binders. If each binder has the same number of cards, how many cards are in each binder?
