## Solve each problem.

1) Gwen received 553 dollars for her birthday. Later she found some toys that cost 7 dollars each. How many of the toys could she buy?
2) The ring toss game at the carnival made 987 dollars in 7 days. If they made the same amount of money each day, how much did they make per day?
3) Kaleb was reading through his favorite book. The book had 174 pages and it took Kaleb 6 days to finish the book. How many pages did he read per day?
4) A vase can hold 5 flowers. If a florist had 275 flowers, how many vases would she need?
5) Paul's dad bought 496 centimeters of string. If he cut the string into 2 equal pieces, what would be the length of each piece?
6) Jerry has to sell 600 chocolate bars to get a prize. If each box contains 8 chocolate bars, how many boxes does he need to sell?
7) There are 630 students going to a trivia competition. If each school van can hold 2 students, how many vans will they need?
8) Sarah bought 630 bottles of water when they were on sale. If she drank 3 bottles a day how many days would they last her?
9) Olivia uploaded 306 pics to Facebook. If she put the pics into 9 albums with the same number of photos in each album, how many photos were in each album?
10) At the carnival, 2 friends bought 168 tickets total. If they each bought the same amount, how many tickets did each person buy?
