

**Solve each problem.**

**Answers**

- 1) John's freezer had twelve ice cubes in it. If he had to get ice for two cups, how many pieces should he put in each cup to make them have the same amount?
- 2) Debby needs to buy forty apples for apple bobbing. If each bag contains five apples, how many bags will she need?
- 3) At the fair the roller coaster can hold sixteen people total. If each car has four seats, how many cars are there?
- 4) A vase can hold eight flowers. If you had twenty-four flowers, how many vases would you need?
- 5) George bought several boxes of books at a yard sale and ended up with seventy-two books total. If each box had nine books how many boxes did he buy?
- 6) Robin was placing her pencils into rows with two pencils in each row. If she had six pencils, how many rows could she make?
- 7) For the new school year Vanessa's mom bought forty-two glue sticks. If each class needs seven glue sticks, how many classes does Vanessa have?
- 8) Cody has to sell forty chocolate bars to get a prize. If each box contains five chocolate bars, how many boxes does he need to sell?
- 9) A chef can cook eight meals in a minute. If he cooked seventy-two meals, how long did it take him?
- 10) An architect was building a hotel downtown. He built it with thirty-two rooms total. If there are eight rooms on each story how many stories tall is the hotel?
- 11) Each room in a new house needs to have five outlets. If the contractor buys forty outlets, how many rooms are in the house?
- 12) Tiffany had to complete four homework problems. If each page has two problems on it, how many pages does she have to complete?
- 13) Isabel is making bead necklaces for her friends. She has sixty-four beads and each necklace takes eight beads. How many necklaces can Isabel make?
- 14) Frank made forty dollars mowing lawns over the summer. If he charged five bucks for each lawn, how many lawns did he mow?
- 15) Paul had eight pieces of candy. If he put them into bags with four pieces in each bag, how many bags would he have?
