

Use '>', '<' or '=' to solve each problem.

Ex)  $\frac{2}{6} < \frac{3}{6}$

1)  $\frac{3}{4} < \frac{3}{3}$

2)  $\frac{3}{12} < \frac{3}{6}$

3)  $\frac{1}{6} < \frac{2}{6}$

4)  $\frac{3}{10} < \frac{3}{6}$

5)  $\frac{3}{5} > \frac{1}{8}$

6)  $\frac{8}{12} > \frac{7}{12}$

7)  $\frac{3}{5} > \frac{3}{8}$

8)  $\frac{2}{3} > \frac{3}{12}$

9)  $\frac{3}{4} > \frac{1}{4}$

10)  $\frac{6}{10} < \frac{6}{5}$

11)  $\frac{6}{8} > \frac{4}{10}$

12)  $\frac{2}{8} > \frac{1}{8}$

13)  $\frac{3}{4} > \frac{3}{10}$

14)  $\frac{1}{12} < \frac{2}{4}$

15)  $\frac{11}{12} > \frac{6}{12}$

16)  $\frac{2}{12} < \frac{2}{3}$

17)  $\frac{6}{8} > \frac{6}{12}$

18)  $\frac{4}{5} > \frac{3}{5}$

19)  $\frac{4}{5} > \frac{4}{6}$

20)  $\frac{2}{12} < \frac{7}{10}$

Answers

Ex.           <          

1.           <          

2.           <          

3.           <          

4.           <          

5.           >          

6.           >          

7.           >          

8.           >          

9.           >          

10.           <          

11.           >          

12.           >          

13.           >          

14.           <          

15.           >          

16.           <          

17.           >          

18.           >          

19.           >          

20.           <
