	Two Step Problems	Name:

Answers

Solve each problem.

1) Debby uploaded six pictures from her phone and twenty-four from her camera to Facebook. If she sorted the pics into six different albums with the same amount of pics in each album, how many pictures were in each of the albums?

2) Paige's class is going on a field trip to the zoo. If each van can hold three people and there are twenty-two students and two adults going, how many vans will they need?

3) A group of five friends went into a restaurant. The chef already had eight chicken wings cooked but cooked two more for the group. If they each got the same amount how many would each person get?

4) While playing at the arcade, Luke won forty-five tickets playing 'whack a mole' and three tickets playing 'skee ball'. If he was trying to buy candy that cost six tickets a piece, how many could he buy?

5) For Halloween Janet received twenty-five pieces of candy from neighbors and thirty-eight pieces from her older sister. If she only ate nine pieces a day, how long would the candy last her?

6) For homework Olivia had seven math problems and twenty-five spelling problems. If she can finish eight problems in an hour how long will it take her to finish all the problems?

7) Ned was helping the cafeteria workers pick up lunch trays, but he could only carry six trays at a time. If he had to pick up nineteen trays from one table and five trays from another, how many trips will he make?

8) Tiffany and her friends were recycling paper for their class. For every six pounds they recycled they earned 1 point. If Tiffany recycled fourteen pounds and her friends recycled thirty-four pounds, how many points did they earn?

9) Edward was organizing his baseball cards in a binder with seven on each page. If he had eight new cards and twenty old cards to put in the binder, how many pages would he use?

10) The school's baseball team had fourteen new players and thirty-one returning players. If the coach put them into groups with five players in each group, how many groups would there be?
