

**Solve each problem.**

**Answers**

- 1) Mike was collecting cans for recycling. On Saturday he filled six bags up and on Sunday he filled two more bags. If each bag had five cans in it, how many cans did he pick up total?
- 2) Faye bought two new chairs and five new tables for her house. If she spent three minutes on each piece furniture putting it together, how many minutes did it take her to finish?
- 3) Roger was working as a sacker at a grocery store where he made nine dollars an hour. On Monday he worked eight hours and on Tuesday he worked two hours. How much money did Roger make in those two days?
- 4) Robin had five pages of math homework and five pages of reading homework. If each page had seven problems on it, how many problems did she have to complete total?
- 5) Janet was selling her necklaces at a garage sale. She sold two bead necklaces and eight gem stone necklaces. If each necklace cost nine dollars, how much money did she earn?
- 6) At the town carnival Jerry rode the ferris wheel three times and the bumper cars seven times. If each ride cost six tickets, how many tickets did he use?
- 7) Paul was putting his spare change into piles. He had seven piles of quarters and three piles of dimes. If each pile had three coins in it, how many coins did he have total?
- 8) Edward bought eight boxes of chocolate candy and two boxes of caramel candy. If each box has eight pieces inside it, how much candy did he have total?
- 9) Emily's favorite band was holding a concert where tickets were eight dollars each. Emily bought three tickets for herself and her friends and four extra tickets in case anyone else wanted to go. How much did she spend?
- 10) There were seven friends playing a video game online when two more players joined the game. If each player had five lives, how many lives did they have total?
