## Solve each problem.

1) Ned bought eight boxes of chocolate candy and two boxes of caramel candy. If each box has four pieces inside it, how much candy did he have total?
2) While shopping for music online, Katie bought four country albums and three pop albums. Each album came with a lyric sheet and had three songs. How many songs did Katie buy total?
3) Debby was unboxing some of her old winter clothes. She found eight boxes of clothing and inside each box there were five scarves and three mittens. How many pieces of winter clothing did Debby have total?
4) Dave was collecting cans for recycling. On Saturday he filled eight bags up and on Sunday he filled two more bags. If each bag had five cans in it, how many cans did he pick up total?
5) Carol was organizing her book case making sure each of the shelves had exactly five books on it. If she had five shelves of mystery books and two shelves of picture books, how many books did she have total?
6) Paul was working as a sacker at a grocery store where he made four dollars an hour. On Monday he worked four hours and on Tuesday he worked three hours. How much money did Paul make in those two days?
7) Nancy was selling her necklaces at a garage sale. She sold four bead necklaces and three gem stone necklaces. If each necklace cost five dollars, how much money did she earn?
8) At Cody's Restaurant a group with two adults and eight children came in to eat. If each meal cost three dollars, how much was the bill?
9) John and his friend were buying trick decks from the magic shop for four dollars each. How much did they spend if John bought eight decks and his friend bought two decks?
10) A pet store has eight bird cages. If each cage has five parrots and two parakeets in it, how many birds does the pet store have total?
