

**Solve each problem.****Answers**

- 1) Amy and her mom were picking carrots from their garden. Amy picked six and her mother picked thirty-two. If only three of the carrots were good, how many bad carrots did they have?
- 2) For Halloween Robin and her sister combined the candy they received. Robin had forty-two pieces of candy while her sister had fourteen. If they ate thirty-one pieces the first night, how many pieces do they have left?
- 3) Gwen bought two coloring books. One had thirty pictures and the other had twenty-three. After one week she had already colored twenty-two of the pictures. How many pictures does she still have to color?
- 4) Carol had forty math problems and forty science problems for homework. If she finished seventy-four of the problems at school, how many problems did she have to do for homework?
- 5) Bianca was playing a trivia game. In the first round she scored forty-one points and in the second round she scored sixteen points. In the last round she lost forty-eight points. How many points did she have at the end of the game?
- 6) The school cafeteria ordered twenty-eight red apples and forty-one green apples for student's lunches. But, if only forty-five students wanted fruit, how many extra did the cafeteria end up with?
- 7) A pet store had forty-five siamese cats and twenty-eight house cats. During a sale they sold five cats. How many cats do they have left?
- 8) At the school's book fair Oliver bought twenty-two adventure books and thirty-three mystery books. If fifty-three of the books were used, how many new books did he buy?
- 9) While on vacation, Rachel took twenty-nine pictures at the zoo and forty-five at the museum. If she later deleted forty-four of the pictures, how many pictures from her vacation did she still have?
- 10) Vanessa picked thirty-nine tulips and forty-seven roses to make flower bouquets. If she only used twenty of the flowers though, how many extra flowers did Vanessa pick?
