

**Solve each problem.****Answers**

- 1) Dave was selling his old games. He started out with fifty-three but sold forty-five of them. He packed the rest up putting four games into each box. How many boxes did he have to use?
- 2) A store had eighty-three coloring books in stock. They ended up putting them on sale and getting rid of eleven of them. They put the ones they still had onto shelves with eight on each shelf. How many shelves did they use?
- 3) Paul had eighty pieces of clothing to wash. He put twenty-six of them in one load, but decided to split the rest into six equal loads. How many pieces of clothing could go in each of the small loads?
- 4) Rachel picked fourteen flowers for her friend's wedding. She was making bouquets with three flowers in each one. If five of the flowers wilted before the wedding, how many bouquets could she still make?
- 5) For Halloween Faye received sixty-three pieces of candy. She ate thirty-eight pieces then placed the rest into piles with five in each pile. How many piles could she make?
- 6) Oliver bought twenty-three tickets at the state fair. He spent nineteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost two tickets, how many rides could he go on?
- 7) Vanessa's team won their baseball game and scored eighty-seven points total. If Vanessa scored forty-two of the points and everyone else scored nine points each, how many players were on her team?
- 8) A company invited thirty-five people to a luncheon, but twenty of them didn't show up. If the tables they had held three people each, how many tables do they need?
- 9) Mike made fifty-three dollars mowing lawns over the summer. If he spent forty-seven dollars buying new mower blades, how many three dollar games could he buy with the money he had left?
- 10) Sam had twelve dollars. If he spent four bucks on a new game, how many four dollar toys could he buy with the money he had left?

1. _____
