Solve each problem.

1) For Halloween Haley received sixty-five pieces of candy. She ate forty pieces then placed the rest into piles with five in each pile. How many piles could she make?

1. _____

2) Bianca had forty homework problems. She finished eight of them but still had eight pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?

2. _____

3. _____

3) Frank bought thirty-eight tickets at the state fair. He spent twenty-four tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost two tickets, how many rides could he go on?

4. _____

5. _____

4) There are sixty-three students trying out for the school's trivia teams. If thirty-five of them didn't get picked for the team and the rest were put into four groups, how many students would be in each group?

6. _____

7. _____

5) Tiffany had forty-two files on her computer. She deleted thirty-six of them and put the rest into folders with three files in each one. How many folders did Tiffany end up with?

8. _____

9. _____

6) Sam had forty-five dollars. If he spent twenty-one bucks on a new game, how many three dollar toys could he buy with the money he had left?

10. _____

7) A pet store had one hundred eighteen puppies. In one day they sold forty-six of them and put the rest into cages with eight in each cage. How many cages did they use?

8) Billy made seventy-eight dollars mowing lawns over the summer. If he spent thirty-six dollars buying new mower blades, how many six dollar games could he buy with the money he had left?

9) Victor was selling his old games. He started out with seventy but sold forty-nine of them. He packed the rest up putting three games into each box. How many boxes did he have to use?

10) Lana was planting vegetables in her garden. She started with thirty-six seeds and planted twenty-two of them in the big garden and in each of her small gardens put seven seeds each. How many small gardens did Lana have?
