

**Solve each problem.****Answers**

- 1) There are forty-nine students trying out for the school's trivia teams. If seven of them didn't get picked for the team and the rest were put into seven groups, how many students would be in each group?
- 2) A store had seventy-eight coloring books in stock. They ended up putting them on sale and getting rid of forty-six of them. They put the ones they still had onto shelves with four on each shelf. How many shelves did they use?
- 3) Robin picked thirty-seven flowers for her friend's wedding. She was making bouquets with five flowers in each one. If two of the flowers wilted before the wedding, how many bouquets could she still make?
- 4) Oliver bought ten tickets at the state fair. He spent two tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost two tickets, how many rides could he go on?
- 5) Gwen's team won their baseball game and scored fifty-four points total. If Gwen scored twenty-four of the points and everyone else scored six points each, how many players were on her team?
- 6) Faye had thirty-one homework problems. She finished twenty-five of them but still had three pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?
- 7) A pet store had thirty-eight puppies. In one day they sold thirty-two of them and put the rest into cages with two in each cage. How many cages did they use?
- 8) Roger had sixty-one pieces of clothing to wash. He put thirty-one of them in one load, but decided to split the rest into five equal loads. How many pieces of clothing could go in each of the small loads?
- 9) Adam made forty-seven dollars mowing lawns over the summer. If he spent thirty-five dollars buying new mower blades, how many four dollar games could he buy with the money he had left?
- 10) Amy baked forty-nine cupcakes for her school's bake sale. If her brother, Todd, ate thirty-one of them how many packages could she make if she put six cupcake in each package?
