

**Solve each problem.****Answers**

- 1) Roger had nine video games but three of them weren't working. If he wanted to sell the working games for \$nine each, how much money could he earn?
- 2) April's discount flowers was having a sale where each rose was six dollars. If April started with eleven roses and had two roses left, how much money did she earn?
- 3) Janet baked seven brownies, but needed fifteen total for her party. If she used three spoonfuls of flour on each one, how much cups of flour does she still need?
- 4) A chef needs eleven potatoes for a meal. He has already cooked seven. If each potato takes two minutes to cook, how long will it take him to cook the rest?
- 5) George earned six dollars for each lawn he mowed. If he had eight lawns to mow, but forgot to mow four of them, how much money did he actually earn?
- 6) At lunch a waiter had twelve customers and eight of them didn't leave a tip. If he got \$six each from the ones who did tip, how much money did he earn?
- 7) Each chocolate bar in a box cost \$three. If a box had nine bars total and Paige sold all but five bars, how much money would she have made?
- 8) In a video game, each enemy defeated gives you seven points. If a level has eight enemies total and you destroy all but five of them, how many points would you earn?
- 9) Carol earned six points for each bag of cans she recycled. If she had eleven bags, but didn't recycle two of them, how many points would she have earned?
- 10) Cody invited eleven friends to a birthday party, but nine couldn't come. If he wanted to buy enough cupcakes so each person could have exactly five, how many should he buy?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
