

**Solve each problem.**

**Answers**

- 1) A painter needed to paint eleven rooms in a building. Each room takes eight hours to paint. If he already painted nine rooms, how much longer will he take to paint the rest?
- 2) A magician was selling magic card decks for four dollars each. If he started with five decks and by the end of the day he had three left, how much money did he earn?
- 3) At a restaurant each adult meal costs \$two and kids eat free. If a group of seven people came in and four were kids, how much would it cost for the group to eat?
- 4) In a video game, each enemy defeated gives you eight points. If a level has eight enemies total and you destroy all but six of them, how many points would you earn?
- 5) Victor earned seven dollars for each lawn he mowed. If he had eleven lawns to mow, but forgot to mow three of them, how much money did he actually earn?
- 6) A chef needs eleven potatoes for a meal. He has already cooked two. If each potato takes nine minutes to cook, how long will it take him to cook the rest?
- 7) Paige baked nine brownies, but needed twelve total for her party. If she used six spoonfuls of flour on each one, how much cups of flour does she still need?
- 8) Frank had seven action figures, but needed fifteen total for a complete collection. If each one costs \$four, how much money would he need to finish his collection?
- 9) Edward had nine video games but six of them weren't working. If he wanted to sell the working games for \$eight each, how much money could he earn?
- 10) A new building needed twelve windows. The builder had already installed six of them. If it takes two hours to install each window, how long will it take him to install the rest?
