- 1) A new building needed seven windows. The builder had already installed four of them. If it takes seven hours to install each window, how long will it take him to install the rest?

<u>Answers</u>

- 2) At the fair Tom bought eighteen tickets. After riding the ferris wheel he had nine tickets left. If each ticket cost five dollars, how much money did Tom spend riding the ferris wheel?
- 3) Maria earned nine points for each bag of cans she recycled. If she had fourteen bags, but didn't recycle seven of them, how many points would she have earned?
- 4) A painter needed to paint nine rooms in a building. Each room takes three hours to paint. If he already painted five rooms, how much longer will he take to paint the rest?

- 5) Carol baked seven brownies, but needed sixteen total for her party. If she used two spoonfuls of flour on each one, how much cups of flour does she still need?
- 6) A worksheet had eight problems on it. If a teacher had eleven worksheets to grade and had already graded nine of them, how many more problems does she have to grade?

- 7) Roger had nine video games but four of them weren't working. If he wanted to sell the working games for \$two each, how much money could he earn?
- 8) A chef needs eight potatoes for a meal. He has already cooked six. If each potato takes five minutes to cook, how long will it take him to cook the rest?
- 9) Each chocolate bar in a box cost \$nine. If a box had ten bars total and Bianca sold all but six bars, how much money would she have made?
- 10) April's discount flowers was having a sale where each rose was five dollars. If April started with eighteen roses and had nine roses left, how much money did she earn?

## Solve each problem.

- 1) A new building needed seven windows. The builder had already installed four of them. If it takes seven hours to install each window, how long will it take him to install the rest?
- 21
