Solve each problem.

1) At lunch a waiter had thirteen customers and seven of them didn't leave a tip. If he got $three each from the ones who did tip, how much money did he earn?

1. _____

2. _____

2) In a video game, each enemy defeated gives you seven points. If a level has nine enemies total and you destroy all but five of them, how many points would you earn?

3. _____

3) A worksheet had three problems on it. If a teacher had eight worksheets to grade and had already graded two of them, how many more problems does she have to grade?

4. _____

5. _____

6. _____

4) A painter needed to paint ten rooms in a building. Each room takes seven hours to paint. If he already painted three rooms, how much longer will he take to paint the rest?

7. _____

8. _____

5) At a restaurant each adult meal costs $four and kids eat free. If a group of nine people came in and four were kids, how much would it cost for the group to eat?

9. _____

10. _____

6) Cody had eight action figures, but needed fourteen total for a complete collection. If each one costs $two, how much money would he need to finish his collection?

7) Henry had twelve video games but nine of them weren't working. If he wanted to sell the working games for $seven each, how much money could he earn?

8) Roger earned six dollars for each lawn he mowed. If he had ten lawns to mow, but forgot to mow four of them, how much money did he actually earn?

9) Tom invited seven friends to a birthday party, but three couldn't come. If he wanted to buy enough cupcakes so each person could have exactly nine, how many should he buy?

10) April's discount flowers was having a sale where each rose was three dollars. If April started with nine roses and had four roses left, how much money did she earn?

Solve each problem.
