Two Step Problems

Name:

Solve each problem.

1) Frank bought nine boxes of chocolate candy and gave five to his little brother. If each box has seven pieces inside it, how many pieces did Frank still have?

2) Each chocolate bar in a box cost $seven. If a box had nine bars total and Olivia sold all but seven bars, how much money would she have made?

3) Roger earned five dollars for each lawn he mowed. If he had sixteen lawns to mow, but forgot to mow nine of them, how much money did he actually earn?

4) A magician was selling magic card decks for five dollars each. If he started with ten decks and by the end of the day he had three left, how much money did he earn?

5) A trivia team had thirteen members total, but during a game six members didn't show up. If each member that did show up scored three points, how many points were scored total?

6) Debby baked six brownies, but needed fifteen total for her party. If she used seven spoonfuls of flour on each one, how much cups of flour does she still need?

7) There were fourteen friends playing a video game online when nine players quit. If each player left had seven lives, how many lives did they have total?

8) Dave invited thirteen friends to a birthday party, but six couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?

9) Luke had fifteen video games but seven of them weren't working. If he wanted to sell the working games for $three each, how much money could he earn?

10) A worksheet had six problems on it. If a teacher had thirteen worksheets to grade and had already graded nine of them, how many more problems does she have to grade?

Answers

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

Name: **Answer Key**

Solve each problem.

1) Frank bought nine boxes of chocolate candy and gave five to his little brother. If each box has seven pieces inside it, how many pieces did Frank still have?

1. **28**

2) Each chocolate bar in a box cost $seven. If a box had nine bars total and Olivia sold all but seven bars, how much money would she have made?

2. **14**

3. **35**

3) Roger earned five dollars for each lawn he mowed. If he had sixteen lawns to mow, but forgot to mow nine of them, how much money did he actually earn?

4. **35**

5. **21**

6. **63**

4) A magician was selling magic card decks for five dollars each. If he started with ten decks and by the end of the day he had three left, how much money did he earn?

7. **35**

8. **49**

5) A trivia team had thirteen members total, but during a game six members didn't show up. If each member that did show up scored three points, how many points were scored total?

9. **24**

10. **24**

6) Debby baked six brownies, but needed fifteen total for her party. If she used seven spoonfuls of flour on each one, how much cups of flour does she still need?

7) There were fourteen friends playing a video game online when nine players quit. If each player left had seven lives, how many lives did they have total?
