Solve each problem. Round your answer to the nearest tenth.
1)

The spinner has a _____% chance of landing on a B.

2)

The spinner has a _____% chance of landing on a C.

3)

The spinner has a _____% chance of landing on a 1.

4)

The spinner has a _____% chance of landing on a C.

5)

The spinner has a _____% chance of landing on a C.

6)

The spinner has a _____% chance of landing on a 4.

7)

The spinner has a _____% chance of landing on a D.

8)

The spinner has a _____% chance of landing on a D.
9)

The spinner has a _____% chance of landing on a C.
10)

The spinner has a _____% chance of landing on a 4.

11)

The spinner has a _____% chance of landing on a 4.

12)

The spinner has a _____% chance of landing on a 3.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____
8. _____

9. _____

10. _____

11. _____

12. _____

Determining Spinner Percent Chance

Name: **Answer Key**

**Solve each problem. Round your answer to the nearest tenth.**

1)

The spinner has a ____% chance of landing on a B.

2)

The spinner has a ____% chance of landing on a C.

3)

The spinner has a ____% chance of landing on a 1.

4)

The spinner has a ____% chance of landing on a C.
5)

The spinner has a ____% chance of landing on a C.

6)

The spinner has a ____% chance of landing on a 4.
7)

The spinner has a ____% chance of landing on a D.

8)

The spinner has a ____% chance of landing on a D.
9)

The spinner has a ____% chance of landing on a C.

10)

The spinner has a ____% chance of landing on a 4.

11)

The spinner has a ____% chance of landing on a 4.

12)

The spinner has a ____% chance of landing on a 3.

Answers

1. **30**
2. **22.2**
3. **37.5**
4. **11.1**
5. **20**
6. **16.7**
7. **20**
8. **30**
9. **33.3**
10. **30**
11. **40**
12. **33.3**
