## Name: Determine if the statement shown is "true" or "false". **Answers** All trapezoids are quadrilaterals. true false 2. All parallelograms have four sides of equal length sides. false 3. All rhombuses have only 1 set of equal length sides. false true 5. All rectangles have 4 sides that are equal length. true 6. true All squares are quadrilaterals. false All squares are rectangles. true false 10. All squares are rhombuses. true 11. true 12. All parallelograms are squares. All rhombuses are parallelograms. All quadrilateral have 4 sides equal length. A trapezoid only has 1 pair of parallel sides.

12) A trapezoid has angles can be any degree.
