

Solve each problem.

- 1) Isabel had forty-one songs on her mp3 player. If she wanted to put the songs equally into seven different playlists, how many songs would she have left over?

- 2) An industrial machine can make forty-five crayons a day. If each box of crayons has seven crayons in it, how many full boxes does the machine make a day?

- 3) There are forty-three people attending a luncheon. If a table can hold three people, how many tables do they need?

- 4) A botanist picked forty-three flowers. She wanted to put them into five bouquets with the same number of flowers in each. How many more should she pick so she doesn't have any extra?

- 5) Henry had forty-five baseball cards he's putting into a binder with two on each page. How many cards will he have on the page that isn't full?

- 6) There are forty-one students going to a trivia competition. If each school van can hold five students, how many vans will they need?
