## Determine the elapsed time for each problem.

1) Faye drove to her aunt's house, arriving at $4: 55$. If Faye started her drive at $3: 20$, how long did the drive take?
2) Victor was invited to birthday party that started at $2: 15$. If the party ended at 6:05, how long did the party last?
3) Paul woke up from a nap at $2: 55$. If he originally went to sleep at 1:50, how long was his nap?
4) Robin's parents left to go shopping at 3:55. If they got back home at 7:35, how long were they gone?
5) Sarah was helping her mom cook dinner. They finished the meal at 9:20. If they started cooking at $6: 20$, how long did it take them?
6) Bianca went to the town carnival. She arrived at $2: 20$ and left at 5:45. How long did Bianca spend at the carnival?
7) Henry started exercising at $6: 20$. If he stopped at $8: 20$, how long did he spend exercising?
8) John started playing video games at $1: 20$. If he took a break at $4: 50$, how long had he been playing?
9) Sam started cleaning up his yard at $1: 35$. If he finally finished at 3:55, how long did Sam spend cleaning his yard?
10) Paige finished cleaning her room at $6: 25$. If she had started cleaning it at $2: 40$, how long did it take her to clean her room?
