Solv	Solve each problem.			
1)	Given the numbers 10 and 46, how much would you need to subtract from the larger number to make it less than the smaller number?	1		
2)	Given the numbers 10 and 36, how much would you need to subtract from the larger number to make it less than the smaller number?	2		
3)	Given the numbers 15 and 48, how much would you need to add to the smaller number to make it even with the larger number?	4.		
4)	Given the numbers 53 and 18, how much would you need to subtract from the larger number to make it less than the smaller number?	5. 6.		
5)	Given the numbers 40 and 28, how much would you need to subtract from the larger number to make it even with the smaller number?	7		
6)	Given the numbers 9 and 71, how much would you need to subtract from the larger number to make it even with the smaller number?	8. 9.		
7)	Given the numbers 9 and 93, how much would you need to subtract from the larger number to make it less than the smaller number?	10		
8)	Given the numbers 32 and 74, how much would you need to subtract from the larger number to make it less than the smaller number?	12		
9)	Given the numbers 34 and 55, how much would you need to subtract from the larger number to make it even with the smaller number?			
10)	Given the numbers 63 and 45, how much would you need to subtract from the larger number to make it even with the smaller number?			
11)	Given the numbers 29 and 45, how much would you need to subtract from the larger number to make it less than the smaller number?			
12)	Given the numbers 63 and 15, how much would you need to add to the smaller number to make it even with the larger number?
