Examining Two Values Relative Size

Name:

Solve each problem.

1) Given the numbers 75 and 11, how much would you need to add to the smaller number to make it greater than the larger number?

2) Given the numbers 99 and 65, how much would you need to subtract from the larger number to make it even with the smaller number?

3) Given the numbers 90 and 72, how much would you need to subtract from the larger number to make it even with the smaller number?

4) Given the numbers 18 and 82, how much would you need to add to the smaller number to make it greater than the larger number?

5) Given the numbers 25 and 79, how much would you need to subtract from the larger number to make it even with the smaller number?

6) Given the numbers 34 and 26, how much would you need to add to the smaller number to make it even with the larger number?

7) Given the numbers 76 and 90, how much would you need to subtract from the larger number to make it less than the smaller number?

8) Given the numbers 44 and 57, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 83 and 87, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 66 and 26, how much would you need to add to the smaller number to make it even with the larger number?

11) Given the numbers 88 and 43, how much would you need to subtract from the larger number to make it even with the smaller number?

12) Given the numbers 49 and 24, how much would you need to subtract from the larger number to make it even with the smaller number?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

1-10	92	83	75	67	58	50	42	33	25	17
11-12	8	0								

Solve each problem.

1) Given the numbers 75 and 11, how much would you need to add to the smaller number to make it greater than the larger number?

2) Given the numbers 99 and 65, how much would you need to subtract from the larger number to make it even with the smaller number?

3) Given the numbers 90 and 72, how much would you need to subtract from the larger number to make it even with the smaller number?

4) Given the numbers 18 and 82, how much would you need to add to the smaller number to make it greater than the larger number?

5) Given the numbers 25 and 79, how much would you need to subtract from the larger number to make it even with the smaller number?

6) Given the numbers 34 and 26, how much would you need to add to the smaller number to make it even with the larger number?

7) Given the numbers 76 and 90, how much would you need to subtract from the larger number to make it less than the smaller number?

8) Given the numbers 44 and 57, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 83 and 87, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 66 and 26, how much would you need to add to the smaller number to make it even with the larger number?

11) Given the numbers 88 and 43, how much would you need to subtract from the larger number to make it even with the smaller number?

12) Given the numbers 49 and 24, how much would you need to subtract from the larger number to make it even with the smaller number?

	Answer
1.	**65**
2.	**34**
3.	**18**
4.	**65**
5.	**54**
6.	**8**
7.	**15**
8.	**14**
9.	**5**
10.	**40**
11.	**45**
12.	**25**

1-10	92	83	75	67	58	50	42	33	25	17
11-12	8	0
